

## Lego Turtle...Wheelchair?

播出時間：2022 / 4 / 6

星期三 中午 12:00

英文小達人：809 周淳嘉

編輯老師：陳思恩老師

各位老師，各位同學，大家午安，我是 809 周淳嘉，我是今天的英文小達人，今天，我要為大家播報的內容，是 Lego Turtle...Wheelchair?

Lego building blocks have their origins in the European country of Denmark. They have been delighting children and adults since 1949. They have made movies, games, and also created the Legoland amusement parks. There are Lego-building competitions and Lego robotics competitions every year.

Lego enthusiasts can let their imaginations run free, and build something amazing using only Lego blocks.

Recently, Legos were used to help an animal in trouble. A zoo employee in Maryland (USA) found a box turtle with a broken bottom part of its shell. The employee took the turtle to work and it was checked by the veterinarian there.

The turtle's shell would be able to heal, but they needed to find a way to keep the shell from touching the ground.

How were they going to do this and still let the turtle walk around? Thankfully, a Lego enthusiast came to the rescue and built a Lego wheelchair for the turtle. The turtle started using the wheelchair immediately and should be completely healed by spring of next year.

Thanks for your listening. See you next time!
