各位老師，各位同學，大家午安，我是 809 周淳嘉，我是今天的英文小達人，今天，我要為大家播報的內容，是 Finland Again is the Happiest Country in the World

According to the World Happiness Report 2021, Finland has been named the happiest country in the world for the fourth year in a row. Iceland and Denmark follow in second and third place on the list, while Taiwan is ranked 24th on the list and is the happiest country in East Asia. This year, the report looks at the link between people's wellbeing and COVID-19. One of the main reasons that Finland stays on the top is people's trust in one other and confidence in their government during this hard time.

On average, there was no decline in wellbeing on people's rating of their own life said John Helliwell, an editor of the report and a professor at the University of British Columbia. It is likely that people see COVID-19 as an outside threat and believe that we can get through the pandemic together.

The report was made by the UN Sustainable Development Solution Network. It ranked 149 countries based on six factors, including gross domestic product per person, freedom, trust, healthy life expectancy, social support, and generosity.

Thanks for your listening. See you next time!
