星期三 中午 12:00

英文小達人：804 朱麒翔

指導老師：陳思恩老師

各位老師，各位同學，大家午安，我是 804 朱麒翔，我是今天的英文小達人，今天，我要為大家播報的內容，是 Magic Trick: Video Tutorial

Welcome, everyone, once again to Mike's Magic Class. Today I'm going to show you how to perform the coin-through-solid-glass trick. First, the trick.

In my left hand I'm holding a small glass bowl, and in my right hand I have a coin. I place the coin in the palm of my right hand. Now I'm going to hit my palm against the bottom of the bowl once, . . . twice, . . . three times. And presto! The coin has passed through the bottom of the bowl and is now inside it.

Here's the explanation.

First, make sure you hold the bowl at the top between your thumb and middle finger, like this. Then, after you hit the bowl with your palm for the second time, secretly move the coin from your palm to your fingertips, like this. Then, when you hit the bottom of the bowl with your palm, the coin will jump from your fingertips, bounce off your left hand and fall into the bowl from above. But it will look like it passed through the bottom of the bowl.

Remember, everyone, practice makes perfect, so don't worry if you can't do it right away. And I'll see you guys next time!

Thanks for your listening. See you next time!
